Wassim Ben Amor

Senior Software Engineer

Experienced Senior Software Engineer with over 8 years in fullstack web development, specializing in creating efficient and scalable frontend solutions with a strong focus on JavaScript frameworks and modern web practices.

Experience

2020 - Present

Contentsquare - Paris, France

Senior Software Engineer

- **Software Engineer, Zoning Team:** Developed and enhanced the Zoning feature, a central product component enabling clients to view analytics on visual snapshots of their websites. Employed DOM serialization to capture site structure, allowing websites to be re-displayed in iframes for analysis. Addressed challenges in maintaining visual consistency within these snapshots, providing clients with valuable insights into user interactions on specific site elements.
Angular, NgRx, NestJS (microservices architecture), PostgreSQL

- **Core DevX Team:** Transitioned to the Core DevX team to lead key projects aimed at enhancing frontend architecture. Designed and implemented a micro-frontend system with a Svelte container to support MFEs built in Angular, React, and Vue.js, following web component standards. Directed major migrations from Vue 2 to Vue 3 and Angular 9 to 16, significantly improving performance, maintainability, and code consistency.
Svelte, Angular, React, Vue.js

- **Tooling and Developer Productivity:** Delivered extensive tooling support across teams, enhancing monorepo management with Turborepo and pnpm. These improvements streamlined workflows and significantly boosted developer productivity and efficiency throughout the organization.
Turborepo, pnpm, GitHub Actions

2018 - 2020

Askhub - Paris, France

Technical Lead

- **Built a full-stack analytics platform** with a serverless backend on AWS and a responsive React frontend, enabling clients to track chatbot usage through detailed analytics.
- **Enhanced user experience** with clear, intuitive UI/UX, providing clients with easy-to-navigate dashboards and insightful charts to monitor chatbot performance.
- **Led development and team collaboration**, guiding technical decisions and sharing best practices to ensure quality and efficiency across the project.

React, Redux, AWS Lambda, AWS S3, AWS DynamoDB

2016 - 2018

Vynd - Tunis, Tunisia

Frontend developer

- **Developed UI mockups** in Angular2, turning design concepts into interactive, visually engaging web pages for a venue-search platform.
- **Applied web design skills** to create and improve mockups, ensuring a smooth and user-friendly experience for people searching venues.
